Indian Railways, Swiss  
counterpart ink MoU

**New Delhi:**Indian Railways has renewed its MoU with Swiss Railways to enhance technical cooperation between the two countries. The MoU will cover areas such as track maintenance, tech collaboration and infrastructure modernisation of the Railways. **OUR BUREAU**

Yatharth Hospitals to  
expand footprint in Delhi

**New Delhi:**Yatharth Hospitals, which operate hospitals in Delhi – NCR region, has announced acquisition of a super-speciality hospital in Delhi for a cost of approximately ₹160 crore. The acquisition will add 300 beds to Yatharth's existing tally. **OUR BUREAU**

# Coal imports see modest rebound in September, poised to rise further

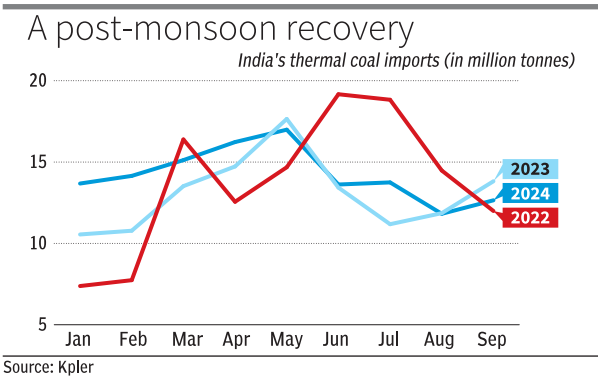

**DEMAND-LED GROWTH.** Seaborne thermal coal imports rose by 5% on a monthly basis to 12.65 million tonnes

**Rishi Ranjan Kala**  
New Delhi

Following the end of the monsoon season, including clocking the lowest imports in 2024 so far during August, India's thermal coal shipments have rebounded, albeit marginally, during September.

However, seaborne thermal coal imports by the world's third largest energy consumer are expected to rise further in the current month and the ongoing quarter as demand picks up.

According to energy intelligence firm Kpler, India's seaborne thermal coal imports rose by almost 5 per cent on a monthly basis last month to 12.65 million tonnes (mt). The shipments declined by around 9 per cent on an annual basis.

“Following a seasonal low of 12.08 mt in August, imports experienced a modest rebound to 12.65 mt in September, down by 1.17 mt y-o-y. The end of monsoon season typically correlates with lower hydro and wind power output, increasing the country's reliance on coal-fired generation. This was likely the driving factor be-

hind the extension of the import directive to power plants in mid-October,” Kpler's Lead Major Dry Bulks Analyst Alexis Ellender told *businessline*.

**ENERGY DEMAND UP**

Going ahead, he projected that India's seaborne thermal coal imports are poised to rise further in Oc-

tober as demand picks up following the end of the monsoon season.

**POSITIVE OUTLOOK**

“The outlook for thermal coal imports has been boosted by Indian miners struggling to achieve significant growth in domestic coal production. At 68.96 mt, September output was up by only 2.51 per cent y-o-y. This followed a 7.51 per cent annual decline in August,” Ellender explained.

India's cumulative coal production rose by 2.51 per cent y-o-y to 68.96 mt during September 2024. Captives/ Others also registered a positive growth of 30.61 per cent y-o-y producing 14.26 mt coal.

Despatch of the dry fuel increased by 5.32 per cent to 73.99 mt in September 2024. Captives/ Others too re-

gistered a positive growth of 46.72 per cent on an annual basis by despatching 14.91 mt.

Compared to August 2024, pan-India coal production rose by 10.04 per cent, while despatch was higher by 5.11 per cent. Historically, monsoon months of June-September result in subdued mining and transportation activities as rains hinders mobility. Wide spread and heavy to very heavy rains across eastern India impacted mining and mobility this year.

“Higher-than-usual rainfall is expected to weigh on coal production in the first half of October. However, we do not expect thermal coal imports to reach the heights of the Q4 2023 as stockpiles at power plants are around two thirds higher y-o-y,” Ellender said.

## Every Indian should be proud of our defence growth journey, says Modi

**Our Bureau**  
New Delhi

Prime Minister Narendra Modi

“(We've moved) from a time when our forces faced critical equipment shortages to an era of self-reliance today — this is a journey that every Indian can be proud of,” Prime Minister Narendra Modi said on Wednesday, hailing the growth in the defence sector.

The PM, who directed Defence Minister and other cabinet colleagues to spend Diwali with troops, said this in a LinkedIn post, headlined “India's Defence Revolution Takes Flight!”

“Yesterday was a watershed moment in India's defence and aerospace journey as we inaugurated the C-295 aircraft manufacturing complex in Vadodra, alongside my friend Mr Pedro Sanchez,” Modi stated.

“The speed of execution is breathtaking — from foundation stone to operational facility in just two years! This is a clear manifestation of a new work culture and the capabilities of the people of India,” he pointed out.

**SOARING PRODUCTION**

He said the defence production has soared to ₹1.27 lakh crore (2023-24), exports have skyrocketed from ₹1,000 crore in 2014 to ₹21,000 crore 2024 and over 12,300 items have been indigenised in just 3 years.

The Prime Minister also stated that over ₹7,500 crore have been invested in domestic vendors by DPSUs, and 25 per cent of defence R&D budget is being dedicated to industry-led innovation.

Pointing out at the manufacturing success, Modi said, “indigenous warships are patrolling our waters, Made-in-India missiles are strengthening our de-

terrence and domestically produced bulletproof jackets protecting our soldiers”.

India, as per Modi, is becoming *Aatmanirbhar* in defence and is also working to be a top-of-the-line defence equipment manufacturer. He also emphasised on innovation initiatives and stated that iDEX (Innovation for Defence Excellence) is powering an entire start-up eco-system.

The MSMEs are becoming integral to the defence supply chain and industry-academia partnerships are fostering R&D in the sector, he wrote.

Thanks to the strengths and skills of our Yuva Shakti and the efforts of the government, we are seeing the following impacts: Reduced import dependency, job creation across defence manufacturing, skill development for our youth and MSMEs getting a boost in the defence sector, he stressed.

**CALL FOR YOUTH**

Reaching out to the nation, the PM said, “To our youth, start-ups, manufacturers, and innovators - India's defence sector is calling! This is your moment to be part of history. India needs your expertise and enthusiasm.”

“Together, let's build a stronger, self-reliant Bharat!” he urged.

## India, China complete troop disengagement at Depsang & Demchok

**Dalip Singh**  
New Delhi

Indian and Chinese troops will exchange sweets on Diwali after a long time, following the completion of disengagement process at friction points of Depsang plains and Demchok. Both sides have returned to their April 2020 position along the Line of Actual Control (LAC) in Eastern Ladakh to end the four-year-long Galwan stand-off.

Local commanders of the rank of Brigadier and lower from the Indian Army and Chinese PLA met at a border personal meeting point along the LAC on Wednesday to workout the modalities

for mutually agreed patrolling, which is expected to start by the end of this month, according to Army sources.

These events are unfolding as per the mutually agreed upon schedule during the agreements signed at diplomatic and military levels.

**HEALTHY PROGRESS**

Verification of disengagement of troops and make-shift infrastructure, such as tents and tin-sheds, to the April 2020 position is going on, said Army sources.

Mapping of the patrolling grid, including the frequency and strength of armed troops, will be mutually documented to avoid a

repeat of April 2020 incident in Galwan valley that left 20 Indian soldiers dead, said Army sources.

The sources added that patrolling will commence soon.

Speaking to journalists in Kolkata, Chinese Ambassador to India Xu Feihong said the two countries had reached “many important understandings”.

“There was a very important meeting between President Xi Jinping and PM Narendra Modi (on the sidelines of the BRICS summit in Russia last week). Now that the two leaders have reached important understandings, these (understandings) will be the guidelines for the further

Xu Feihong, China's Ambassador to India, at an event in Kolkata on Wednesday

development of relations between our two countries. I hope that, under the guidance of this consensus, our relations will be moving forward smoothly in the future and they will not be restricted or interrupted by dis-

agreements between our two sides,” Xu Feihong said.

“The meeting of the two leaders has set a very good example for us on how to handle these differences,” the Chinese ambassador added.

**BIG BREAKTHROUGH**

On October 21, India had announced a breakthrough in border talks leading to the resumption of suspended patrolling at Depsang plains and Demchok and the return of troops to the April 2020 position. A day later, China also confirmed the disengagement agreements. However, negotiations are on to include other border friction issues, from Arunachal Pradesh to Jammu

and Kashmir, including the settlement of buffer zones and no patrolling zones created after the mutually-agreed disengagements at previous five patrolling points, such as in Hot Springs, Gogra Post, Galwan Valley and Pangon Tso.

The US State Department welcomed the ‘reduction in tensions’ along the India-China border owing to breakthrough to end the stand-off in Eastern Ladakh. “We understand that both countries have taken initial steps to withdraw troops from the friction points along the LAC. We welcome any reduction in tensions along the border,” US State Department spokesperson Matthew Miller said.

## John Cockerill bags order from AM Green to set up India's largest electrolyser at Kakinada

**Our Bureau**  
New Delhi

AM Green said on Wednesday that it has inked a strategic partnership with John Cockerill for a 1.3 gigawatt (GW) advanced pressurized alkaline electrolysers located in an existing plant in Kakinada (Andhra Pradesh).

By August 2024, AM Green made the final investment decision (FID) for its first one-million-tonne green ammonia project, which the company claims is India's largest electrolyser order.

The plant is scheduled to start production in the second half of 2026. It includes 1.3 GW of electrolysers to be supplied in two phases of 640 megawatt (MW) for the production of green hydrogen and its subsequent conversion into

green ammonia.

“This major order will expedite the delivery of the first phase of and is part of the strategic partnership agreement between AM Green and John Cockerill to work on projects that will foster creation of a green hydrogen ecosystem in the Indian subcontinent,” AM Green said.

**AMBITIOUS PLANS**

As part of this pact, John Cockerill and AM Green are also developing India's largest electrolyser manufacturing plant (2 GW per year) in Kakinada, thus contributing to green hydrogen production target under the National Green Hydrogen Mission. This plant will supply the 2nd phase of 640MW of electrolysers to AM Green Kakinada project, it added.

AM Green's production of green ammonia across

multiple locations in India will accelerate its goal to reach 5 million tonnes per annum (mtpa) of green ammonia capacity by 2030, supporting its efforts to achieve net zero targets both in India and OECD markets.

This output will be equivalent to approximately 1 mtpa of green hydrogen, accounting for one-fifth of India's target for green hydrogen production under the National Green Hydrogen Mission and 10 per cent of Europe's target for green hydrogen imports. The Kakinada facility has been certified by CertifHy as compliant with EU RFNBO requirements for green ammonia, including additional and renewable energy timeliness.

AM Green has already executed off-take agreements for this project with major players for intended end use

in a range of green hydrogen applications. Anil Chalamalasetty, Group Chairman of AM Green, said, “This collaboration will position the country as a leading export hub for lowest cost green molecules that adhere to the highest standards, including EU RFNBO norms. “With this collaboration, we are not just advancing India's green hydrogen goals, but also decarbonising industries globally like refining, shipping, fertilizers, power generation, and chemicals.”

John Cockerill CEO François Michel said, “This order is a major step in the development of our hydrogen business. Our advanced electrolysis technology, combined with renewable energy solutions, will play a key role in the mass adoption of green hydrogen and green derivatives in the region and beyond.”

## Deendayal Port allocates 3,400 acres for setting up green hydrogen projects in Kandla

**Avinash Nair**  
Ahmedabad

The Deendayal Port Authority (DPA) has allotted 3,400 acres of land to four corporate houses for setting up of 5.5 million tonnes per annum (mtpa) of green hydrogen producing units near Kandla port in Gujarat.

“This port is one of the three ports that have been declared as a green hydrogen hub under the National Green Hydrogen Mission. We have allotted land to four players including Reliance Green Hydrogen and Green Chemicals Ltd, Larsen & Toubro Green Energy Tech Ltd, Welspun New Energy Ltd and AM Green Hydrogen Ltd. These companies are expected to set up around 5.5 mtpa capacity for producing green ammonia by 2030-31,” Sushil Kumar Singh, Chairman of Deendayal Port Authority —

**GREEN AMBITIONS.** Kandla port aims to host 5.5 mtpa of green hydrogen producing units by 2030-31

that manages and operates Kandla port — told *businessline*.

While L&T has been allotted 1,900 acres, Reliance received 900 acres, AM Green 450 acres and Welspun 150 acres. “Green hydrogen and its derivatives like methanol and green ammonia will be exported and will also be used as an alternate fuel bunkers for vessels that will come up in future.” Apart from Kandla, Tuticorin and

plant that will address the water requirements for the proposed green hydrogen units at Kandla. “The port has already floated an Expression of Interest (EoI) for 300 mld of desalination plant,” the DPA Chairman said. The power required for these green hydrogen projects will be 9 GWs.

**HYDROGEN BUSES**

Earlier this week, the DPA has also signed an MoU with NTPC for setting up a hydrogen plant at Kandla. “This hydrogen will be used for running 11 hydrogen-powered buses at Kandla. These buses are expected to start running by August 2025,” Singh said.

## TN Green Energy Corp's plea to restrict night solar usage faces industry backlash

**G Balachandhar**  
Chennai

A petition filed by Tamil Nadu Green Energy Corporation Ltd (TNGECL) to restrict the use of solar power during night hours, if approved, could discourage future investments in solar power projects in the State, according to industry representatives.

While limiting solar power usage at night may deter investors from pursuing new projects, industry experts have also contested TNGECL's claims of financial losses, attributing the losses to other causes. TNGECL submitted its petition to the Tamil Nadu Electricity Regulatory Commission (TNERC), citing financial strain and requesting changes to energy slot timings and the provision to allow solar energy generation to be

adjusted against consumption during peak hours.

However, K Venkatchalam, Advisor to the Tamil Nadu Spinning Mills' Association, rejected this reasoning, stating, “Allowing solar power adjustment at night does not cause losses, as the ‘peak hour charges’ collected from industrial consumers, based on the Commission's Tariff Orders, covers any shortfall.”

He explained that the real reason behind TANGEDCO's losses stems from unmetered power supply which prevents the PSU from accurately tracking the amount of “free power” supplied, hindering its ability to collect the appropriate subsidies from the State.

This is in violation of Section 55 of the Electricity Act 2003. An industry representative argued that TNGECL lacks the legal authority to seek these changes.

## AP's economy should touch \$2.4 trillion by 2047: CM Naidu

**Our Bureau**  
Hyderabad

Andhra Pradesh Government is working towards taking the State Gross Domestic Product (GSDP) to \$2.4 trillion as part of the Vision 2047, said Chief Minister N Chandrababu Naidu.

Discussing the main components of the Vision 2047 with a team of NITI Aayog officials, led by its CEO BVR Subrahmanyam in Amara-vati on Wednesday, Naidu said the target was reachable as the vision was to achieve 15 per cent growth in the economy per annum.

**VISION DOCUMENT**

With balanced regional growth as one of its objectives, the vision document has been prepared to take the development activity down to the district/constituency level, the Chief Minister said.

Andhra Pradesh Chief Minister N Chandrababu Naidu

The Vision 2027 would comprise diverse growth engines such as demographic development, social and economic growth, creation of social and physical infrastructure, ease living with eradication of poverty, data centres and artificial intelligence, among others, he added.

## AP to launch free gas cylinder scheme from tomorrow

**Our Bureau**  
Hyderabad

The supply of free cooking gas cylinder scheme, which is part of the super six promises of the ruling NDA Government in Andhra Pradesh, will come into force from November 1 as the State government has released the necessary funds for the Deepam-2 scheme.

Chief Minister N Chandrababu Naidu formally handed over the subsidy amount to the representatives of Bharat Petroleum, Hindustan Petroleum and Indian Oil Corporation at the first block in the State Secretariat for the implementation of the scheme.

**ELECTION PROMISE**

In line with its election manifesto of the NDA Alliance, the State Cabinet at its recent

meeting approved the total expenditure of ₹2,684 crore per annum for the supply of these free cylinders per year.

The beneficiaries can now book the cylinders since the facility came into force on Tuesday.

The amount, ₹876 excluding the Central subsidy of ₹25, spent for the cylinder will be credited to the personal account of all the beneficiaries in just 48 hours.
